

# 6 Simple Upholstery Cleaning And Care Tips

## Vacuum Every Week

Vacuuming is a must for general maintenance of upholstery. Periodically take your vacuum cleaner to remove the surface dirt and soil from the furniture.

## Switch The Cushions

Keeping your cushions looking nice is only a matter of turning them and fluffing them occasionally—you can also switch their places if some get more usage than others.

## Know Your Fabrics

Each fabric has different needs when it comes to cleaning. Before you start washing your upholstery, check the tag for the manufacturer's care instructions.

## Keep Your Upholstery Protected

You can take some simple measures to keep your upholstery from becoming easily stained! So, don't be afraid to look into water repellents or fabric protectors.

## Avoid Direct Sunlight

Fabric can be easily damaged when exposed to some elements, such as direct sunlight or smoke, so it's best to avoid these whenever possible.

## Spot-Clean The Fabric

Accidents can be impossible to avoid altogether. When a spill happens, spot-clean the fabric as quick as you can to prevent it from soaking in the liquid.
